

## Reliable Engineered Design Values & Installation Specifications

Design Information, Installation Instructions and Technical Evaluation Reports (TERs) provide product design tables and installation specifications backed by testing and engineering analysis.

DrJ believes that code compliance should be straightforward. In the context of the building design and plan review process, DrJ's Design Information and Installation Instructions help foster alternative material, design and method of construction innovation. The DrJ process is fully compliant with all state administrative and professional engineering laws in a way that is easy to understand.

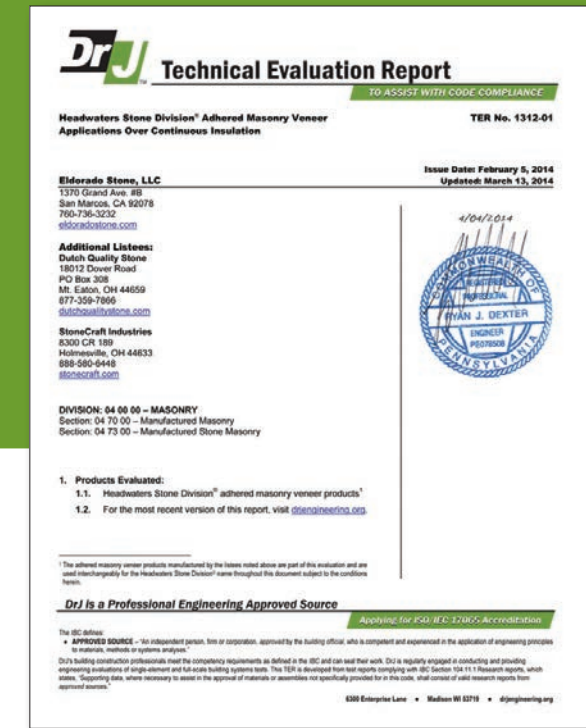

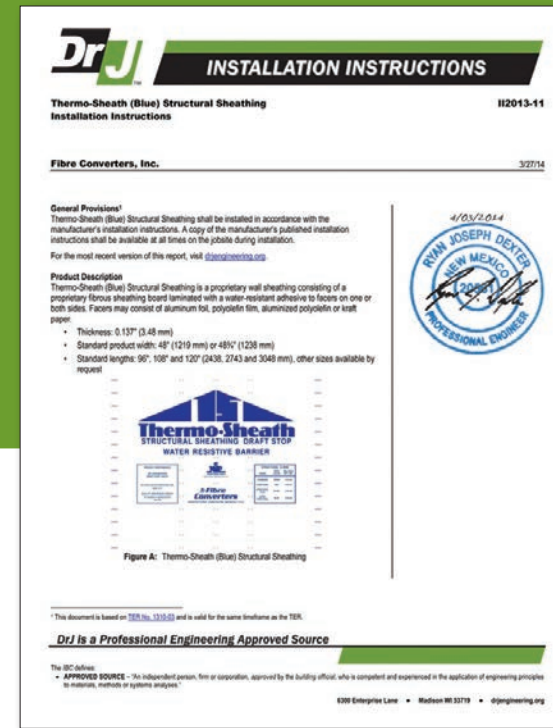

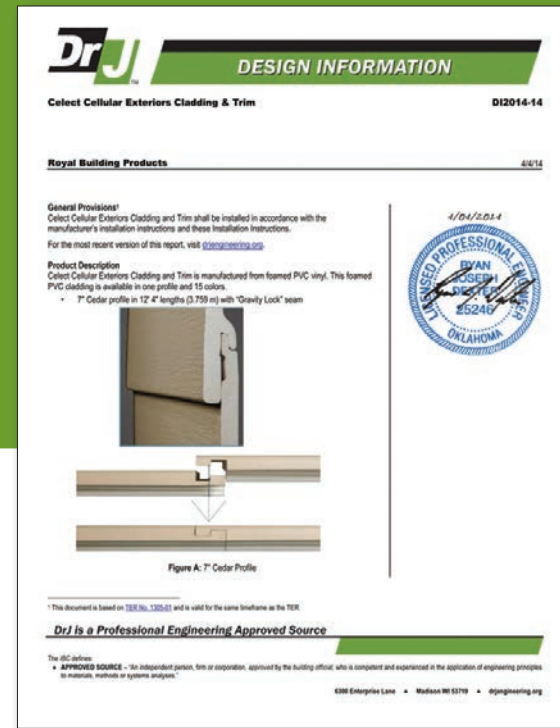

### Professional Engineering Supports Unfettered Competition

DrJ believes that supporting product innovation for the construction marketplace has great value to consumers and the construction industry overall.

The approval of Design Information, Installation Instructions and TERs also relies on compliance with the Sherman Act, which is a "comprehensive charter of economic liberty aimed at preserving free and unfettered competition as the rule of trade."

## Design Information, Installation Instructions & TERs Foster Alternative Material, Design & Method of Construction Innovation

DrJ complies with professional engineering law and the code.

**Professional Engineer Prepares Design Information**

**Sealed Design Information Provides Building Design Data**

**Building Official Reviews Submittal Documents**

**Sealed Installation Instructions Provide Installation Details**

**Sealed Design Information Becomes Part of the Construction Documents**

**Submittal Process Complies with the Building Codes**

**Sealed Installation Instructions Help Product Installation & Inspection**
